### 1 SCOPE OF TEST

The Combine Harvester was tested in accordance with IS:8122 (Pt.II) - 2001. The scope test was to check and assess the following:

- Specification and other data furnished by the applicant 1.1
- 1.2 Engine performance
- 1.3 Header lifting test.
- Radius of turning space & turning circle. 1.4
- Location of centre of gravity. 1.5
- 1.6 Visibility from operator's seat.
- Performance of brakes. 1.7
- Air cleaner oil pull-over test 1.8 1.9
- Vibration of various assemblies /sub-assemblies. 1.10
- 1.11
- Ambient noise emitted and noise at driver's ear level. Field performance and suitability of the machine for harvesting wheat and paddy crops
  - i) Quality of work
  - ii) Rate of work
  - iii) Fuel consumption
- 1.12 Ease of adjustment and handling; 1.13
- Operator's comfort and safety; 1.14
- 1.15
- Nature of breakdowns and repairs; and Wear of various critical components.

## 2 METHOD OF SELECTION

The machine was directly submitted for test by the applicant at the Institute. The method selection is not known.

## 3 SPECIFICATION

3.1 Name & Address of manufacturer

M/S GURJEET COMBINE BAHIR JACHH

THE. PATTRAN PATIALA -147105(Punjal 0947851798, 01764- 284075

Model

**GURJEET** Serial Number **GURJEET 975** Туре

Year of manufacture CC975C71013 Self propelled MARCH 2013

3.2 Prime mover

## **GURJEET 975** SELF PROPELLED COMBINE HARVESTER - Comm. (ICT)

#### Remarks:

- The maximum power output of the engine was observed as 92.1 kW (125.2 Ps) & i) 80.8(109.9)kW 77.2(105.0), 79.8 (108.5) at 2250rpm and 1625, 1400,1375 rpm of engine at full throttle and setting recommend for field operation respectively.
- The specific fuel consumption corresponding to maximum power was measured as 0.266(0.195)0.237(0.174),0.237(0.174) & 0.233(0.171) Kg/kwh (kg/hph) which is considered to be slightly on the higher side at full throttle setting.
- The back-up torque of the engine was measured as 30.8 which is considered to be normal.
- The maximum smoke density was recorded as 4.45 (Bosch No.) which is within the permissible iv)
- The maximum temperature of engine oil, coolant(water) and exhaust gas were observed as 108.4, 99.0 and 492° C respectively. The cool water and exhaust gas were observed as 108.4, 99.0 and 492° C respectively. The engine oil temperature is considered on high side
- The lubricating oil & coolant consumption during five hours rating test were measured as 0.392g/kWh (0.288g/hph) and 0.32% of total coolant. 0.392g/kWh (0.288g/hph) and 0.32% of total coolant capacity respectively.

18.2 Turning ability:

The radius of turning circle at LHS and RHS was observed as 9.97 and 9.81 and turning space as 11.27 and 11.11respectively without brake

The radius of turning circle at LHS and RHS was observed as 8.49 and 8.58 and turning space as 9.79 and 9.88respectively with brake.

18.3 Visibility:

The visibility around the cutter bar from operator's seat in normal sitting position is satisfactory.

## 18.4 Braking Performance:

- The mean deceleration and stopping distance corresponding to 455 N pedal force was measured as 5.17 m/sec 2 and 5.5 m respectively. measured as 5.17 m/sec <sup>2</sup> and 5.5 m respectively and the performance is in line with the lS
- The performance of parking brake was found satisfactory.

The amplitude of mechanical vibration of components marked as (\*) in chapter 13 of this report of the vibration of this report in the vibration of t are on higher side. This calls for providing suitable remedial measures to dampen the vibration order to improve the operational comfort and some suitable remedial measures to dampen the vibration and some suitable remedial measures to dampen the vibration of this remedial measures to dampen the vibration of t in order to improve the operational comfort and service life of various components & sub

## Noise measurement:

The ambient noise emitted by the machine was measured as 90dB(A) which is on higher side.

The poise at driver's par level is of 88 dP(A). when compared with warning and danger limits of 88 dB(A) respectively.

The noise at driver's ear level was measured as 99 dB(A) respectively.

Der day specified by ILO

The noise at driver's ear level was measured as 99 dB(A) respectively.

Der day specified by ILO compared with warning and danger levels of 98 dB(A) respectively.

per day specified by ILO.

Graph of the warning and danger levels of 98 dB(A) respectively for an exposure of 8 hours.

#### 18.7 Field Test:

#### Summary of field tests: 18.7.1

The results of the field test are summarized below:

The results of the field test are so		Wheat harvesting	Paddy harvesting	
SI Observation		3.34 to 3.51	1.41 to 3.31	
<ol> <li>Forward spee</li> </ol>	ed (kmph)	0.890 to 1.01	0.319 to 0.773	
2. Area covered	(ha/h)	0.090 to 1.01		
3. Fuel consump		7.20 to 7.62 7.17 to 8.52	6.22 to 6.67 8.09 to 20.15	
- (l/ha)		5.38 to 11.1	6.37 to 17.21	
4. Crop through	put (tonne/h)	0.002 to 0.004	0.001 to 0.182	
<ol><li>Grain break outlet(%)</li></ol>	kage in main grain	0.143 to 0.349	0.219 to 0.401	
6. Header losse	s(%)	0.281 to 0.502	0.351 to 1.096	
	lectable losses(%)	0.576 to 1.387	0.329 to 1.493	
	ble losses(%)	0.903 to 1.670	0.870 to 2.05	
Total Collecta		98.56 to 99.98	98.98 to 99.72	
Total process	sing losses(%)	98.56 to 99.50	97.87 to 98.79	
The Stilling Cit	iciency(%)	97.97 to 99.49		
<ol> <li>Cleaning efficiency</li> </ol>	ciency(%)		as 0.002 to 0.004% wh	

## 18.7.1.1

- The grain breakage in all the varieties tested was measured as 0.002 to 0.004% which is i)
  - The total non collectable losses ranged from 0.281 to 0.502% which is considered normal. The total processing losses ranged from 0.903 to 1.670% which is considered normal.
- ii)
- iii) iv)
- The threshing efficiency ranged from 98.56 to 99.98% which is considered normal. The cleaning efficiency ranged from 97.97 to 99.49% which is considered to be normal. V)

## 18.7.1.2

- The grain breakage ranged from 0.001 to 0.182% which is considered to be normal The total non-collectable losses ranged from 0.351 to 1.096% which is considered to be i)
- The total processing losses ranged from 0.870 to 2.05% which is considered to be normal ii)
- The threshing efficiency ranged from 98.98 to 99.72% which is considered to be normal. iii)
- The cleaning efficiency ranged from 97.87 to 98.79%. which is considered to be normal. iv)
- V)

# The performance of combine to harvest wheat and paddy crops was evaluated as the same 18.7.2

- The controls provided around the operator are within easy reach but not labelled with symbols as per the requirement of the controls provided around the operator are within easy reach but not labelled with symbols as per the requirement. The controls provided around the operator are within easy reach but not labelled with symbols as per Indian standard. Therefore it is recommended that the symbols as per the requirement of IS condition. 18.7.3 i)

  - The safety covers for drive chain sprovided from safety point of view. ii) iii)
- considered essential & may be provided from salety point of view.

  Spark arresting device is not provided in the engine exhaust system which is considered essential. iv)

CENTRAL FARM MACHINERY TRAINING & TESTING INSTITUTE - BUDNI

## Comb-59/1428/2014

### **GURJEET 975** SELF PROPELLED COMBINE HARVESTER - Comm. (ICT)

- Slip clutch for reel drive, cutter bar drive and threshing drum drive are also considered V) essential from safety point of view.
- The mechanical arrangement for adjusting the reel speed though provided needs to be vi) modified such that the same could be controlled from the operator's position.
- Mechanical lock for reel in raised position needs to be provided to ensure safety while working vii) on cutter bar.
- The load on the front and rear tyres exceeds the maximum load carrying capacity of the tyre viii) (front- 3450 Kg/tyre and rear- 2290 Kg/tyre). Suitable tyres with load matching may be considered.

#### Assessment of Wear: 18.7.4

- The wear of engine components i.e cylinder liners, piston, piston rings, valves, valve guides, springs, big-end hearings, and man bearings.
- springs, big-end bearings and man bearings were observed within the permissible limit. The transmission gears and components were found in normal working condition. ii)
- iii)
- The timing gears, clutch lining, release bearing were found in normal working condition. The condition of the components of brake, hydraulic system and steering system was iv)
- The condition of the bearing, chains, sprockets and belts was observed to be normal. V)
- The components of starter motor and alternator were found in normal working condition. vi)
- The rate of wear of rasp bar and peg teeth of threshing cylinder & concave were observed to be normal. vii)

#### Hardness and Chemical composition: 18.8

- The hardness of knife blade both in the Hardened Zone & remainder zone was measured as 72 to 73 and 68 to 69 HRC respectively. The hard 72 to 73 and 68 to 69 HRC respectively. The hardness of knife blade is not conforming to the requirement of IS: 6025-1999.
- The percentage of carbon was recorded as 0.419 percent in knife guard which is on lower side against the requirement of 0.70 to 0.95% as per 10 and 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower against the requirement of 0.70 to 0.95% as per 10 knife guard which is on lower ag side against the requirement of 0.70 to 0.95% as per IS:6025-1999.
- The percentage of Manganese was recorded as 0.801 & 0.645 percent in cutter bar blade and knife guard respectively which is on higher side. and knife guard respectively which is on higher side against the required range of 0.30% to 0.50% as per IS 6025-1999.
- It is therefore, recommended that the material used for fabrication of above components iv) should essentially meet the requirement of Indian Standard.

#### Maintenance/Service problems: 18.9

No noticeable maintenance/service problem was observed during the course of test at this linstitute, however indicator for servicing of dry file. Institute, however indicator for servicing of dry filter element of air cleaner need to

### Labelling Plate of Combine Harvester: 18.10

On labelling plate is Power is not provided, on the combine harvester which not conforming to requirements of IS: 10273-1987. This should be looked in requirements of IS: 10273-1987. This should be looked into corrective action.

#### Literature supplied with the Machine: 18.11 18.11.1

- The following literature was supplied with the machine for reference during testing
  - ii)
  - Instruction book of Ashok Leyland not provided which is essential. iii) iv)
  - Operators manual of combine harvester not provided, which is essential.
