T-840/1349/2012

# M/s. Shree Krishna Agro Industries, BALRAM 950 DI TRACTOR – Commercial (Initial)

Manufacturer : M/s.Shree Krishna Agro

Industries,Balram Mini Tractor, Sasan Talala Road,Near Borvav

Patiya, Tahsil Talala Gir,

Distt:Junagadh-362150, (Gujarat)

Test requested by (applicant) : Applicant Selected for test by : Applicant

Place of running-in : At applicant's works

Duration of said running-in (h):

- Engine : 49 - Transmission : 40

Method of Selection : The tractor was submitted directly by the

applicant for test. Hence method of

selection is not known.

### 1. SPECIFICATIONS

1.1 Tractor:

Make : M/s Shree Krishna Agro Industries

Model : Balram 950 DI

Brand name : None

Type : Four wheeled, two wheel driven,

Agricultural Tractor without Power Take

off Shaft.

Year of manufacture : October, 2011
Chassis number : BJ0110021
Country of Origin : INDIA

Country or origin

1.2 Engine:

Make : M/s. P.M. Diesels Pvt.Ltd.

Model : FH - 785

Type : Four stroke, air cooled, naturally

aspirated, direct injection, diesel engine

Serial number : EJ7229

Engine speed (Manufacturer's recommended production setting), (rpm):

 - Maximum speed at no load
 : 2700 -2900

 - Low idle speed
 : 900 - 1250

 - Speed at maximum torque
 : 1180 -1580

Rated speed, (rpm):

- For PTO use : NA - For drawbar use : 2600

1.3 Cylinder & Cylinder Head:

Number : One

### M/s. Shree Krishna Agro Industries, BALRAM 950 DI TRACTOR - Commercial (Initial)

15.4 Brakes:

Description	Initial specified height of lining (mm)	Measured thickness of brake lining after test, (mm)	Measured height of lining over rivet head, (mm)	Minimum permissible height of lining over rivet head, (mm)
Left	9.10 to 8.90	6.49 to 7.15	1.02 to 2.13	Up to rivet head
Right	9.10 to 8.90	6.23 to 7.02	0.98 to 2.08	

15.5 Front axle:

Any marked wear of king pins : None Any marked wear of king pin bushes

Clearance between king pins and bushes,

: 0.08 to 0.275 (mm)

Against discard limit of 0.40 mm

Condition of thrust bearings : Normal Condition of bearings for stub axles : Normal

Condition of seals for stub axles and king

Clearance between centre pin and bush, (mm)

: 0.14 to 0.19

: None

: Normal

Against discard limit of

0.80 mm

Steering system: 15.6

Visual condition of the components of : Normal

complete steering assembly

15.7 Starter motor & Alternator:

Presence of soil/oil in housing : None Condition of bearings and other: Normal

Components

### 16. ADJUSTMENTS, DEFECTS, BREAKDOWNS AND REPAIRS

SI. No.	Adjustment/ Defects/ breakdowns and Repairs	Tractor run hours
(i)	During engine performance test fuel filter was found partially chocked & replaced with new ones.	5.3
(ii)	During final wear assessment burred & scratches were marks observed on the centre pin.	86.0
(iii)	Some part of RHS brake shoe lining was found broken and removed itself from the brake plate.	86.0

### 17. SUMMARY OF OBSERVATIONS, COMMENTS & RECOMMENDATIONS

17.1 Evaluative (mandatory) / Non-evaluation (Non-mandatory) parameters applicable for qualifying Minimum Performance criteria as per Clause-4 (Table-1) of IS: 12207-2008 for acceptance of the tractor for the purpose of subsidies/NABARD financing are summarized as under:

S. No.	Characteristic	Category (Evaluative / Non Evaluative)	Requirements as per IS: 12207-2008	Values declared by the applicant (D)/ Require- ment (R)	As observed	Whether meets the require- ments (Yes/No.)
--------	----------------	---	---------------------------------------	---	----------------	---

Page 40 of 44

T-840/1349/2012

# M/s. Shree Krishna Agro Industries, BALRAM 950 DI TRACTOR - Commercial (Initial)

#### Salient Observations: 17.4

#### 17.4.1 Laboratory tests:

#### Engine Performance: 17.4.1.1

- i) The backup torque is 36.6 %.
- ii) The specific fuel consumption corresponding to maximum power was measured as 287 g/kWh against the declaration of 262 gm/kWh, which does not meet the requirement of IS: 12207-2008 with regard to tolerance.

### 17.4.1.2 Power lift and hydraulic pump performance:

The moment about rear axle with hitch point and standard frame was calculated as 4.60 kN-m and 5.13 kN-m. Whereas, the moment about the front axle was as calculated 4.51 kN-m under unballasted condition. The moment about rear axle is on higher side as compared to the moment about front axle. It is therefore, recommended that standard ballast mass at front axle may be provided to avoid front lifting of the tractor

# 17.4.1.3 Air cleaner pull over test :

The maximum oil pull over was recorded as 0.26% when tractor parked on ground level position against the maximum limit was 0.25%. This should be examined and suitable improvement should be done.

### 17.4.1.4 Mechanical vibration:

The amplitude of mechanical vibration marked as (\*) in chapter-9 of this report are on very higher side especially at foot rest, steering control wheel and operator's seat. This calls for reduction in amplitude of vibration in view of improving service life of the component(s) and the operator's comfort.

# 17.4.1.5 Three point linkage:

The Lateral distance from lower hitch point to centre line of tractor and power range (without force) does not meet the requirement of IS: 4468- (Part-2) -1993 (Cat. 1N Narrow Hitch). This may be looked into for necessary corrective action.

### 17.4.1.6 Linkage Drawbar:

The dimensions 'A' and number of holes on linkage drawbar does not meet the requirements IS: 12953- 1990 & IS: 4468 (Part-2)-1993. This should be looked into for necessary corrective action.

#### Operator's Seat: 17.4.1.7

- The length of seat from SIP, width of seat does not meet the requirement of IS: 12343-1988. This should be looked into for necessary corrective action.
- The height of upper edge of back rest above SRP does not meet the requirement of IS: 12343-1988. This should be looked into for necessary corrective action.
- Longitudinal adjustment provided on operator's seat i.e. forward and rearward from the mid position was not provided, against the minimum and optimum requirement of ± 25 mm and ±100 mm respectively. In view of enhancing comfort level of operation, this may be looked into.

CENTRAL FARM MACHINERY TRAINING & TESTING INSTITUTE - BUDNI

Page 41 of 44

T-840/1349/2012

# M/s. Shree Krishna Agro Industries, BALRAM 950 DI TRACTOR - Commercial (Initial)

#### 17.4.1.8 Location and operation of operator's control:

- Anti silp surface, vertical retainness at both side and provision for drainage of water is not provided in brake and clutch foot pedals which does not meet the requirement of the IS: 12239 (Part-1)-1996. This should be looked into for necessary corrective action
- The alternator 'V' belt is not guarded which does not meet the requirement of the IS: 12239 (Part-1)-1996. This should be looked into for necessary
- Working clearance around the hydraulic draft control lever and the position control lever does not meet the requirement of the IS: 12239 (Part-2)-1996. This should be looked into for necessary corrective action

#### 17.4.1.9 Symbols of operator's control and other displays:

Some of the controls / display such as grease lubricant frequency, oil lubricant type & frequency, caution, vertical movement implement and engine revolution gauge are not identifiable with the symbols as per IS: 6283 (Part 1&2)-1998. This needs to be looked into for necessary corrective action.

#### Location and operation of operator's control: 17.4.1.10

Location and movement of following controls does not meet the requirement of IS: 8133-1983 and calls for necessary corrective action.

Marking on hydraulic control lever is not provided.

#### Field performance test: 17.4.2

#### Dryland operation: 17.4.2.1

During mould board plough operation excessive wheel slippage was observed. Suitable ballast mass may be recommend for field operation.

### Wetland cultivation (Puddling operation): 17.4.2.2

The manufacturer has recommended that the tractor is not suitable for wetland cultivation (puddling operation). Hence, the wetland cultivation (puddling operation) was not conducted.

### Component/ assembly inspection 17.4.3

During final wear assessment burred & scratches mark observed on the centre pin and some part of RHS brake shoe lining was found removed itself from brake shoe assembly. This should be looked into.

#### Maintenance / Service Problems: 17.4

No noticeable maintenance or service problem was observed during the test.

#### 17.5 Recommendation with regard to safety on tractor:

The following requirements, inter alia, may be considered for incorporation on the tractor:

- Provision of spark arresting device in the exhaust system.
- Provision of safety against accidental start of engine.
- Provision of Differential lock.

CENTRAL FARM MACHINERY TRAINING & TESTING INSTITUTE - BUDNI

Page 42 of 44

# M/s. Shree Krishna Agro Industries, BALRAM 950 DI TRACTOR – Commercial (Initial)

17.6 Adequacy of Literature supplied with machine:

17.6.1 The following literature has been supplied by manufacturer for reference during the test.

- a) Operator's manual for Balram 950 DI Tractor
- b) Service manual for Balram 950 DI Tractor
- c) Spare part's catalogue for Balram 950 DI Tractor
- 17.6.2 The literature should be brought out in national & regional languages also.

# M/s. Shree Krishna Agro Industries, BALRAM 950 DI TRACTOR – Commercial (Initial)

### ANNEXURE-I

### BRIEF SPECIFICATION OF IMPLEMENTS USED DURING FIELD TEST

S. No.	l t e m	M.B.Plough	Cultivator
1.	Make	Not specified	Not specified
2.	Туре	Mounted	Mounted
3.	No. of bottoms/blades	Two	Seven
4.	Type of bottoms/blades	General purpose	Reversible shovel
5.	Size of bottoms/blades, (mm)	350	325 x 60 x 7
6.	Spacing of bottoms/flanges, (mm)	200	220
7.	Lower hitch point span, (mm)	460	509
8.	Mast height, (mm)	350	410
9.	Overall dimensions (mm):		
	- Length	1100	1530
	- Width	530	590
	- Height	810	830
10.	Gross mass, (kg)	60	80

### ANNEXURE-II

### TRACTOR RUN HOURS DURING TEST

A.	LABORATORY AND TRACK TESTS:	HOURS	
1.	Running-in	-	
2.	Engine performance test	10.5	
3.	Power lift and hydraulic pump performance test	0.8	
4.	Drawbar performance test	12.6	
5.	Turning ability	0.2	
6.	Location of centre of gravity	0.2	
7.	Operator's field of vision	0.2	
8.	Brake test	1.0	
9.	Noise measurement	1.4	
10.	Air cleaner oil pull over test	3.5	
11.	Mechanical vibration test	0.5	
12.	Theoretical speed test	0.4	
B.	FIELD TEST:		
1.	M.B. Ploughing	24.8	
2.	Cultivator operation	10.6	
C.	HAULAGE TEST:	11.5	
D.	Miscellaneous test and other run hours including idle run, transportation, trials and preparation for test	7.8	
	TOTAL:	86.0
